MD-Cu₂₉
ANTIMICROBIAL COPPER

OASIS has the only EPA-registered, antimicrobial copper touch points for its comprehensive line of water coolers and fountains.

ANTIMICROBIAL COPPER punches holes in the membrane of bacteria at the cellular level, effectively destroying them. The popularity of copper surfaces to replace traditional touch points in hospitals and other critical care industries is a testament to the natural anti-microbial effectiveness of copper!

We manufacture our plastic components with **Freshield®**, our exclusive silver-based antimicrobial compound. Like copper, the antimicrobial ability of silver has been known for thousands of years. We simply harness nature to make yours a safer hydration experience.

Freshield reduces the growth of micro-organisms and mildew to protect the surfaces from discoloration, odors and degradation.

DIMENSIONS

**All measurements in mm.*

By being ADA compliant, OASIS ensures that our products are accessible to people with disabilities.
